

CHROMA FORGE

Slender Mold Art Bible · Version 1.1

Seven factory molds woke when the Great Palette shattered. Not nations. Molds. Each remembers a different war — circuit, impact, neon, salt, honor, plastic, vacuum — but all of them run on one law: **color is rank, technique, and voltage**. This pack is the shareable brief. Attach the zip or this PDF to any chat, artist thread, or engine channel.

These are concept models and a production system, not finished FBX files. Build seven slender humanoid meshes in Blender from the sheets. Recolor in Unity with the included scripts.

Proportion lock — slender

This revision kills bulk. Every mold shares the same lean fashion-toy body so a pink dummy and a deep-red knight still look like they came from one factory.

Measure	Target
Height	1.80 m hero · Army Man 1.72 m
Heads tall	7.5–8
Shoulder width	2.0–2.2 heads (never past 2.3)
Waist	0.55–0.62 of shoulder
Arm span	Equal to height
Hands	+10% toy scale for readability
Tris LOD0	8k–16k depending on mold

If armor makes the shoulder wider than 2.3 heads, cut the armor. Do not fatten the body.

Lineup — slender pass. Shared limb length, shared waist, shared toy seam language.

The 33-charge palette

Eleven hues. Three depths. Pale is a recruit. Standard is a veteran. Deep is a named piece that survived the box. Never bake these into albedo. They are ScriptableObject data.

HUE	PALE	STANDARD	DEEP
WHITE	#F4F1EA	#E6E0D4	#C9C2B4
BLACK	#3E3E42	#16161A	#07070A
BLUE	#7EB8E8	#2E6BFF	#0A2A6B
GREEN	#8FDC7A	#2F8B3A	#163D18
YELLOW	#FFE566	#FFD100	#B8860B
RED	#FF6B6B	#E10600	#7A0000
ORANGE	#FFB347	#FF6A00	#C44D00
PINK	#FFB6D9	#FF4FA3	#C71585
PURPLE	#C9A0FF	#7B2CBF	#3C096C
BROWN	#C4A574	#8B5A2B	#4A2C14
GREY	#C0C4C8	#6E7378	#3A3D40

Mask law: R = Primary, G = Secondary, B = Accent. Eyes and teeth stay on a second material or in the black of the mask. Tron Bots keep the body in Ink/Void and put the named hue into Accent + emission (Pale 1.5 / Standard 3.5 / Deep 6).

Power system

Manga wants named techniques. Production wants three verbs that every mold shares: **Dash** (mobility), **Mark** (paint the world in the unit hue), **Break** (spend shade depth on a finisher). Pale dashes farther and breaks weaker. Deep dashes shorter and breaks the screen. Hybrid rule: Primary chooses the animation set. Accent chooses the VFX color.

The seven slender molds

Robot Ninja

Silent Circuit Clan

Slim mecha assassin. Thin kabuto visor, long forearms, folded back-blades, twin short katanas. No bulky pauldrons. 13–16k tris.

Techniques: Optical Smear / Circuit-Cut / Mute Field

Crash Test Dummy

Unbreakable Cohort

Tall sensor doll, not a barrel. Rubber-ring neck, circular eyes, rib bands on a narrow torso, long ball-joint limbs. Vinyl. 11–14k tris.

Techniques: Rebound / Data Scar / Full Dummy Protocol

Tron Bot

Grid Sentinel

Lithe Program. Hard bevels, neon sitting in grooves, one-volume helmet, identity disc on the back. Body stays near black. 11–15k tris.

Techniques: Line Walk / Identity Throw / Derezz

Pirate

Salt-and-Chrome Corsair

Lean coat, fitted waist, tricorn, hook, cutlass. Coat is a separate cloth mesh. 13–16k tris.

Techniques: Black Spot / Boarding Hook / Powder Night

Knight

Painted Order

Fitted plate, wasp waist, thin crest, modular helm/chest/tabard/shield/sword.
Hidden body deleted. 14–16k tris.

Techniques: Color Guard / Oath Swing / Last Standard

Army Man

Plastic Battalion

54mm toy language stretched to slender hero height. Single-color plastic, sagittal mold line, molded face. 8–11k tris. Default Green Standard.

Techniques: Bag Spill / Mold Line / Whole Platoon

Astronaut

Void Walker

Sleek technical suit, compact pack, spherical helmet, cyan ring light, long legs. Not a marshmallow. 12–15k tris.

Techniques: Soft Vacuum / Beacon / Re-entry

Unity architecture

One prefab per mold. Thirty-three palette assets. Zero duplicated materials per color. Push color through a MaterialPropertyBlock onto a single ChromaLit shader.

Folder contract

```

```

Shader Graph

Sample greyscale albedo. Sample RGB mask. tint = Primary·R + Secondary·G + Accent·B. baseColor = albedo × tint. ORM pack is AO / Roughness / Metallic. emission = Accent × EmissiveMask × EmissionStrength. Feed a URP Lit master.

Sockets on every mold

socket_weapon_r · socket_weapon_l · socket_back · socket_hat · socket_fx_chest · socket_fx_eye

Animation

Unity Humanoid only. Mixamo for Idle / Walk / Run / Jump / Hit / Death plus three class attacks. Retarget once. Class extras live on Animator layers with Avatar Masks. Do not custom-rig seven skeletons.

Build order

1. Shader + 33 palettes on grey cubes. 2. Army Man. 3. Knight. 4. Tron Bot. 5. Dummy. 6. Astronaut. 7. Pirate. 8. Robot Ninja last — most silhouette-sensitive.

Copy-paste artist brief

Seven slender humanoid hero molds, collectible-toy style, 8–16k tris, Unity Humanoid, T-pose, applied scale, +Z forward. Greyscale albedo + RGB tint mask + packed ORM + optional emissive. Three tint zones only. Shared 7.5–8 head proportions, narrow waist, long limbs. Weapons socketed. No baked brand colors. Build Army Man first as the shader proof. Use the concept sheets in /concepts and the hex table in this bible.

The molds are the game. Color is the army. Keep those two ideas welded together.
